Business Bins

Mixed recycling

For businesses that generate a variety of waste that could be suitable for recycling

If you run a typical office, shop or simply have a wide variety of waste that could be recycled, this is the bin for you. Recycling saves you money because we can do something useful with it – and mixed recycling bins are really easy to use.

Glass recycling

Especially good for pubs, clubs and restaurants

If you have a lot of glass bottles and jars from bar or food operations, recycling glass can help you save money. Just like paper and card, glass can also be used to make something useful. All colours of glass are welcome in our bins.

Food recycling

Especially good for pubs, clubs, food stores and restaurants

Food waste is heavy and very expensive to throw away as refuse. But it could be so much more if you recycle it. You might even help to grow your next customer's meal... and it's certainly cheaper.

- ✓ All cooked or uncooked food waste

You can wrap your food in plastic bags. But no other packaging please. Consider internal food caddies to help you gather and manage your recycling.

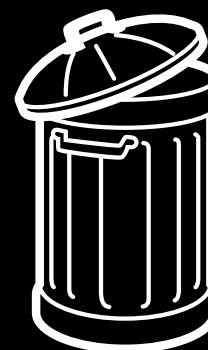

Non-recyclable refuse

We know that not everything can be recycled, which is why we offer a swift and reliable refuse collection service. We have a number of bin sizes to choose from.

But remember, refuse is much more expensive than recycling, which is why we want to help you recycle as much as you can.

- ✓ Waste that cannot be recycled using our other services

- ✗ Waste that could be recycled using our other services

Consider how we can help integrate recycling as well, to keep your overall costs down.
