### Disclaimer

The Council does not accept liability for any factual inaccuracies or omissions within the Land Availability Assessment ('LAA'). The information within the LAA represents the best information available at the base date of April 2022. Evidence information received since April 2022 has been included where necessary to provide an accurate assessment.

Readers of this document are advised that additional constraints, which may have not been considered or listed, may apply to the identified sites and that planning applications will continue to be determined on their own merits, rather than on the information contained within this study. Issues may arise during the planning application process that could not have been foreseen in the preparation of the LAA. Landowners and applicants are advised to carry out their own analysis of site constraints for planning applications.

## 1.0 Introduction

- 1.1 The Epsom and Ewell Land Availability Assessment (LAA) is a technical study which informs the emerging Epsom and Ewell Local Plan (2022-2040). It helps to inform future plan-making by identifying sites and broad locations, then assessing this land for its development potential. From this assessment, sites can be chosen for further assessment, which can be subsequently included in the Local Plan (Development Plan) to help meet objectively assessed needs. It does not in itself determine whether a site should be allocated for development but is the first step in the process.
- 1.2 The Council has produced this report in accordance with the Epsom and Ewell Availability Assessment Methodology (2022) which is available to view on the Council's website. It closely follows the recommended process set out in the Government Planning Practice Guidance (PPG) which states that where a standard methodology is followed correctly, "a local planning authority should not need to justify the methodology used in preparing its Assessment, including at independent examination". The Council consulted key stakeholders including neighbouring authorities, the county council, the Environment Agency and Natural England on a draft LAA methodology in June 2022.
- 1.3 The assessment of land availability identifies land that is suitable, available and achievable for development over the plan period. Some uses are subject to a national policy requirement to identify objectively assessed needs and respond to that need in the Local Plan (for example, new homes, retail and employment land). However, the need for other uses (such as cultural, education, etc.) is identified through the collection of evidence in relation to infrastructure provision, local knowledge, consultation and responding to the individual needs of large development sites. This is also dependent on the availability of land for such uses. The benefit of a wider assessment of land uses is that it ensures that all land is assessed together to consider all possible uses.
- 1.4 The LAA should be viewed as a wide-ranging collection of sites to inform possible site allocations in the emerging Local Plan. It is an aid to plan-making only, presenting the facts about available development land. It is the Local Plan (Development Plan) that identifies the quantum of development being planned for and its spatial distribution. It is not a statement of Council policy and does not rank or compare sites. It does not allocate land, pre-empt or prejudice any decision the Council may make in the future on any particular site and does not alter any existing policies or land use designations as set out in the Development Plan.
- 1.5 This LAA is base dated 1st April 2022 and includes all information known at this point in time in relation to completions and outstanding planning permissions. In order for as many sites to be considered as possible, it includes all sites submitted up until 5 August 2022

### Format of this document

- 1.6 This LAA replaces the SHLAA (2017). It is a new type of document both in terms of content and format. The LAA has been prepared using the methodology set out in the Epsom and Ewell LAA Methodology (2022) that is available on our website under [evidence base](#).
- 1.7 The LAA is presented in the form of an [interactive map](#). Some sites can accommodate more than one land use. Each site has an individual reference code and is mapped on the interactive mapping with details of suitability, availability and achievability of the site, with a summary of site constraints and constraint layers being available to view.
- 1.8 Sites will either be included (sites that are 'deliverable' or 'developable') or discounted. The sites that are 'deliverable' or 'developable' will subsequently be collated as a long list of nominated sites that will be considered further through the Sustainability Appraisal process. Included sites are displayed as green outline on the interactive map. Discounted sites are displayed as red outline on the interactive map and sites that have planning permission are outlined in yellow on the interactive map. The sites are presented alongside an explanation for the conclusion.

## 2.0 Planning Context

### National Policy and Guidance

- 2.1 The NPPF (2021) and the accompanying PPG identifies that the Government wants to use the planning system to significantly boost the supply of housing and support sustainable economic growth and productivity. To facilitate this, assessing the development needs of the borough and identifying specific and deliverable sites is a critical aspect of the Local Plan process.
- 2.2 Specifically, the requirement for local authorities to produce a strategic land availability assessment which enables realistic assumptions about the availability, suitability and likely economic viability of land to meet identified development needs for the duration of the plan period is set out within the NPPF. It identifies the advantages of carrying out land assessments for housing and economic development in tandem, to ensure that sites can be considered for the most appropriate use.
- 2.3 The PPG provides advice on how to undertake LAAs. Simply put, the advice states that a LAA should:
- Identify sites and broad locations with potential for development;
  - Assess their development potential; and
  - Assess their suitability for development and the likelihood of development coming forward (the availability and achievability).
- 2.4 This advice has informed the Epsom and Ewell [LAA Methodology](#) and how the site assessments have been undertaken. It should be noted that the NPPF 'Glossary' defines the definition of a deliverable site as a site which "should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years". This is supplemented by the following:
- sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
  - where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.
- 2.5 The definition of a 'developable' site is less onerous, with the NPPF stating "to be considered developable, sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged"

## 3.0 Methodology summary

- 3.1. This Report follows the [LAA Methodology](#) (2022) that closely follows the recommended process set out in the PPG, which confirms that there is a five-stage approach that should be followed to achieve a robust LAA, namely:
- Stage 1 – Site/broad location identification
  - Stage 2 – Site/broad location assessment
  - Stage 3 – Windfall assessment
  - Stage 4 – Assessment review
  - Stage 5 – Final evidence base
- 3.2. Only sites that can accommodate five or more dwellings or 0.25 hectares/500 sqm. of floorspace will be considered as part of Stage 1 of the assessment.
- 3.3. The LAA is presented by site, rather than land use. This avoids the repetition of sites, as some sites can accommodate more than one land use. Each site that is assessed has an individual reference code related to the ward it is located within. Site maps and a link to the interactive map is available [here](#).
- 3.4. Once all the sites have been assessed, the development potential of included sites (deliverable and developable), along with likely windfall, has been collated to produce an indicative trajectory. This sets out how much housing development can be provided over the plan period and at what point in time (i.e. 1-5 years, 6-10 years, or 11 years and beyond).

- 3.5. The LAA will inform the plan-making process and site options to be assessed through the Sustainability Appraisal (SA) and Strategic Environment Assessment (SEA).

## 4.0 Core Outputs

- 4.1 A total of 194 sites were considered in the LAA. From these, 63 urban sites were considered deliverable or developable and will be included in the housing trajectory. The LAA provides a list of theoretical sites that have been identified for potential future development.
- 4.2 Sites located within the Green Belt that have been promoted through the call for sites process are included to ensure comprehensiveness and completeness of the study however they have not been included in the housing supply calculations, as for the council to make changes to the Green Belt boundary we must demonstrate exceptional circumstances in accordance with national planning policy. It is important to emphasise that the inclusion of these sites does not indicate that these sites will be allocated for future development in the Local Plan. These sites will be subject to further consideration through the Local Plan site selection process and Sustainability Appraisal and Strategic Environmental Assessment (SEA) if necessary (i.e. it can be demonstrated that all reasonable options have been explored to meet future development needs. Only then, can it be concluded that exceptional circumstances exist to justify changes to the Green Belt Boundary). These sites are listed in Appendix 3.

### Stage 1 and Stage 2

- 4.3 Sites that had planning permission are not assessed through the LAA process, these sites will have been fully assessed through the planning application process. The list of sites with planning permission are listed in Appendix 4 and will form part of the housing trajectory.
- 4.4 Sites were rejected at Stage 1 where they did not meet the site size or capacity threshold (Appendix 5).
- 4.5 The remaining sites were carried through into Stage 2 of the assessment process and assessed in greater detail to determine their development potential. From this process, sites were discounted due to their suitability, availability or achievability, these are set out in Appendix 5, along with those identified during Stage 1. These sites can be found on the interactive map with a red outline and the reason(s) for exclusion is set out. Sites were discounted for various reasons including significant constraints or concerns about multiple ownerships which raised land assembly and/or viability concerns.
- 4.6 Following the Stage 2 assessment a total of 63 sites are considered deliverable or developable over the plan period. These sites are identified on [printed maps](#) and an [interactive map](#) and can be identified with a green outline alongside information on the potential timescale for delivery and an estimated yield based on site constraints and the character of the area. These are sites that can be reasonably expected to come forward for future development in the urban area. This has informed the indicative housing trajectory in Table 3. 27 Green Belt sites are also identified but are not included in the housing supply calculations because national policy restricts development in the Green Belt, the potential for these sites coming forward would require exceptional circumstances to be demonstrated. These sites may be looked at for the further as part of the Local Plan. These sites are listed in Appendix 3.

### Stage 3

- 4.7 The LAA methodology sets out that a windfall allowance will be calculated and included in the housing trajectory. The definition of 'windfall' site is sites that are not identified in the development plan. For the purpose of the LAA they are small sites of less than 5 units. The windfall allowance has been calculated using the average windfall completions between 2011 to 2021 as set out in the methodology and table 1 below, the allowance will not be applied for the first 3 years of the housing trajectory to avoid double counting.

	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	Total	Average
<b>Windfall completions</b>	<b>33</b>	<b>31</b>	<b>38</b>	<b>32</b>	<b>29</b>	45	67	33	21	45	<b>374</b>	<b>37.4</b>

Table 1: Windfall calculations: The average over the ten years is 37.4

### Stage 4

- 4.8 The assessment was carried out in accordance with the methodology which is published on the Council's website. The methodology was circulated to key stakeholders, who were invited to make comments. No significant changes were made as a result of the consultation, although some minor and stylistic changes may have been carried out before publication.

## Stage 5

4.9 In line with the LAA Methodology (2022), the following core outputs have been produced as part of the assessment:

- Mapped sites including [printed maps](#) and an [interactive map](#) showing the included and excluded sites with the option to view constraints and other GIS layers;
- A concluding LAA document;
- An assessment of the potential type and quantity of development that could be delivered on each site/broad location, and,
- An indicative trajectory of anticipated development.

### Housing

4.10 A summary of the potential housing numbers from deliverable and developable sites are set out below (Table 2), the details of the individual sites are provided in the interactive map and listed in Appendix 1 and 2. In summary, the LAA considers there is reasonable prospect of these sites coming forward for development within the plan period.

	Deliverable	Developable		Total	No. Of Sites
	0-5 Years	6-10 year	11-15 year		
Auriol	40	0	0	40	2
College	29	10	15	54	4
Court	6	0	25	31	5
Cuddington	0	16	0	16	1
Ewell Court	0	30	0	30	1
Ewell	0	62	145	207	5
Nonsuch	0	10	69	79	4
Ruxley	29	35	11	75	7
Stamford	50	0	25	75	3
Stoneleigh	0	0	30	30	2
Town	131	1122	283	1,526	26
West Ewell	0	0	10	10	1
Woodcote	24	0	0	24	2
	<b>309</b>	<b>1285</b>	<b>603</b>	<b>2197</b>	<b>63</b>

Table 2: Summary of potential housing numbers that can be delivered from sites in the urban area considered to be deliverable/developable.

4.11 The housing trajectory below (Table 3) summarises the number of residential units that can be accommodated on the deliverable and developable sites within the urban area. This demonstrates that there is sufficient land to deliver approximately 37% of the housing need (objectively assessed need based on the standard method) within the plan period.

	2022-2040	21-22	22-23	23-24	24-25	25-26	26-27	27-28	28-29	29-30	30-31	31-32	32-33	33-34	34-35	35-36	36-37	37-38	38-39	39-40	
Housing need (standard method)	10,368	576	576	576	576	576	576	576	576	576	576	576	576	576	576	576	576	576	576	576	
LAA sites	2,197		309					1285					603								
Outstanding permissions	1,041		1041																		
Windfall allowance	561					37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	37.4	
Completion		117																			
Supply	3,799	117		1424.8					1472					790					37.4	37.4	37.4
Deficit	6,569	459		1455.2					1408					2090					538.6	538.6	538.6

Table 3: Housing Trajectory

4.12 The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment identifies a need for 10 pitches for households that met the planning definition up to 2040, and a further 8 pitches for households that did not meet the planning definition where the need should be addressed in the overall housing need for the Borough. The LAA does not identify any specific site to address future Gypsy and Traveller and Travelling Showpeople accommodation. In terms of sites that can meet the need, any site capable of accommodating conventional housing is considered suitable provision for the Gypsy and Traveller pitches provided it is in line with other national policy and guidance on Gypsy and Travellers. Further work associated with the Local Plan will explore specific sites to meet this need.

4.13 The conclusion from this assessment suggests there is insufficient land within the urban area to meet the identified need against the standard methodology of 576 dpa (just under 37%). The LAA methodology set out that if there were insufficient sites to meet the identified need then the Council will need to revisit the assessment and its assumptions to see if

the shortfall can be met. It is unlikely that increasing the density of potential sites is likely to yield a sufficient amount to address the shortfall, nor would revisiting discounted sites (for example there are numerous garage sites). By applying density uplifts at the some of the sites discounted as they are unable to deliver 5 units, this would result in a negligible increase in housing supply discounted garage sites this is insufficient to address the shortfall.

4.14 In this context the Council has written to its neighbours to see if they have excess capacity within their areas to meet any of Epsom and Ewell’s residual housing need. Factoring any responses we receive from our neighbours, we may also need to review whether we need to release some sites that have come forward in the Green Belt. At present, we have not included potential quantum from these sites within the housing land supply calculations but have listed these sites in Appendix 5. The potential yield from all the Green Belt sites would meet approximately 49% of the housing need, still resulting in a shortfall in overall supply when combined with land in the urban area.

**Other uses**

4.15 The Council is in the process of undertaking various technical studies to understand the development needs of non-residential uses. Table 4 below sets out what other uses can be accommodated on identified land.

Other Uses	How has the future need been identified?	LAA urban site reference	LAA GB site reference
Gypsy and Traveller accommodation	Gypsy and Traveller Accommodation Assessment 2022 10 pitches between 2022-2040	Appendix 1, 2	Appendix 5
Specialist Housing	HEDNA The need for specialist housing for older people, student housing and self build are set out in HEDNA	AUR001, TOW001, TOW010	COL017, COU036, NON013, NON021
Retail (Class E)	Retail and Commercial Leisure Needs Assessment Update 2021  Convenience need by 2032 rises to between 2700- 7200 sqm. Recommended to be delivered in any potential new growth areas  Comparison need rises to 700sqm within the Town Centre by 2032, a small surplus where the recommended strategy is of consolidation.	COL002, STO007, TOW001, TOW015, TOW017, STO008, TOW004, TOW007, TOW016, TOW024	NON013, NON016,
Employment	HEDNA Office 19,437 sqm (1.2 ha), Light industrial 9,021 (2.3 ha), B2 General Industry 9,554 sqm (2.4 ha), B8 sqm Storage 18,157 (4.5 ha)	TOW020, COU004-016, COU012, STO008, TOW008, TOW045-050	NON016
Community uses	Infrastructure Development Plan IDP Currently being updated	STA004, TOW009

Leisure/Recreation	Playing Pitch Strategy 2021 Additional need is set out on page 123 of the <a href="#">PPS Sports facility Assessment 2020</a> Recommendation to retain, enhance existing facilities. Additional need is set out on page 134 of the <a href="#">SFA</a>	TOW024	COL023, COU026, NON013, NON021, STA011
Green space	Open Space Audit (currently being prepared)		COL020, COL021, COL024, WOO019
Health	Infrastructure Development Plan IDP Currently being updated		NON013, STA010, STA017, STA018
Other		TOW014, TOW004, TOW021	

Table 4, Other uses that can be accommodated on identified sites.

4.16 Limited development land in the urban area paints a similar picture in relation to non-residential needs, which suggests that the supply is insufficient to meet emerging needs. Emerging numbers suggest that there may be excess provision of retail floor space against the need. This floorspace could instead be considered for alternative commercial, leisure or community use. There is also insufficient land supply of general industry and warehousing floorspace, with only sufficient land to potentially accommodate 0.6 hectares out of 7.2 hectares required. Whilst there is limited undeveloped land within Kiln Lane and Longmead Industrial estates, it may be possible that the remaining employment floorspace could be delivered through the intensification or redevelopment of sites within this area.

## 5.0 Conclusion

- 5.1 The LAA provides a list of theoretical sites that have been identified for potential future development. The study splits these into urban sites and green belt sites, where the green belt sites do not form part of the trajectory. These have been purposely disaggregated to avoid any misinterpretation or prematurity argument of the inclusion of the site in the LAA meaning it will be allocated in the Local Plan.
- 5.2 It is extremely important to reiterate that at this stage in the process that any site considered deliverable or developable for the purposes of the LAA, will require further assessment to warrant allocation in the emerging Local Plan. Also, any site included will also require planning permission and their inclusion within this document does not imply that permission will be granted. The next stages of the Local Plan site selection process, in conjunction with the Sustainability Appraisal and Habitats Regulations Assessment will help the Council to identify which sites should be allocated for development in the emerging Local Plan.

### Next Steps

- 5.3 The assessment was produced with the best information available as of 1st April 2022. The LAA is an iterative process and as such, any future reviews will incorporate any new information available to the Council. This will include any new sites and additional information about the existing identified sites. Further consideration will also be given to windfalls and if necessary, planning permission non-implementation rates.
- 5.4 The Council intends to update the LAA annually to take account of new information. Given that new information may be submitted to, and considered by, the Council at any time, conclusions on the suitability, availability and achievability of the identified sites may be subject to change, as are assumptions on whether sites are deliverable or developable over the emerging plan period.

## 6.0 Appendix 1: List of Deliverable sites

Site name, Address	Ward	Unique Ref	Potential number of Dwellings	Other uses	Area (ha)
Land rear of Rowe Hall, Salisbury Road, KT4	Auriol	AUR001	30	Extra Care Housing	1.22
